

SUSTAINABILITY AT ILLINOIS

The Illinois Climate Action Plan (iCAP) is our strategic plan to achieve carbon neutrality by 2050 or sooner.

In 2019, Illinois joined 200+ universities globally to declare a state of climate emergency, mobilizing to allocate more resources to sustainability efforts. Our Climate Leadership Commitments include collaboration with campus units and the community to become as sustainable as possible.

YOUR PERSONAL ECO-TOUR

1. Tour the [Waste Transfer Station](#)
2. Learn about the [Student Sustainability Committee \(SSC\)](#)
3. Reach out to [Sustainability Working Advisory Teams \(SWATeams\)](#)
4. Discover sustainability at [Facilities & Services \(F&S\)](#)
5. Read [Q Magazine](#), our student-written environmental journal
6. Explore [iSEE sustainability programs](#)
7. Follow us on social media

sustainability@illinois.edu

iSEE IS ACHIEVING CARBON NEUTRALITY

We will achieve net carbon neutrality through our mission to:

- (1) promote interdisciplinary **research** targeting issues within sustainability, energy, and environment
- (2) facilitate sustainability directives customized to **community** needs
- (3) inspire global change through **education & outreach** opportunities.

QUICK TIPS

Need **recycling bins**? Email F&S at recycling@illinois.edu.

Participate! Make an impact through our green certification programs, whether it's for your **office, lab, or Greek life organization**. Don't forget to host a **Green Event!**

Explore. Take a look at the [iCAP portal](#) to see our current projects, conversations, and more. **Sign up for our newsletter** to learn about iSEE!
